Sustainable Plantation Initiative Led By The Community  
To Restore The Mangrove Forestry Of Sundarban.

# The Community Forest

- Over 12,000 saplings planted.
- 80,000 seeds implanted.
- 512 distressed families engaged so far.
- Aiming to plant 4,00,000 Mangroves per year.

You also can  
join by Paying  
Rs. 50/- Per Sapling

Sundarban is being affected by the double blow of Amphan super-cyclone destroying homes, crops and livelihoods, on top of COVID 19 paralyzing the economy and income of daily wage-worker.

Cyclone Amphan hit on 20 May with heavy rains, a massive storm surge and sustained winds of 170 kilometers (105 miles) per hour and gusts of up to 190 kph. It passed directly through the Sundarbans, devastating it. The lives of the estimated 4.5 million people in the region are tied to the fragile ecosystem.

Kolkata Society for Cultural Heritage (KSCH) has taken up this cause as their new project to provide a sustainable method to regain the losses and help the affected people to generate their livelihood. Planting of Saplings at large, their maintenance and cultivation will be facilitated as a sustainable project.

#### Project Area :

1. Hingaljanj, North 24 Parganas
2. Shamshearnagar, North 24 Parganas
3. Gosaba, South 24 Parganas
4. Sandeshkhali II, North 24 Parganas

Address : 43, Saratpally Garia Kolkata 700084
